- MySQL / Postgres
- Jira
- GitHub / GitLab
- JavaScript
- Twig
- GNU/Linux
- Agile Methodology
- PHPUnit

Tyler Staples

BACKEND DEVELOPER

I am an enthusiastic backend developer with ties in the open-source community. I have worked with PHP for the past two years in a professional setting and have worked closely with other members of the Drupal community to organise two successful nationwide events across England.

EXPERIENCE

BACKEND DEVELOPER ZOOCHA LTD.
Oct 2023 - Apr 2026

Developed and enhanced website functionality using PHP to build custom modules and maintain existing codebases according to client specifications. I managed critical upgrade processes to ensure platform security and performance while actively contributing to the tech community through industry conventions and the organisation of DrupalCamp England.

OUTSOURCED FULLSTACK DEVELOPER
HEALTHASPIRE.
Jan 2021 - Aug 2024

At Healthaspire, I managed inventory and maintained the online webstore, ensuring stock levels were accurate and up to date. I leveraged analytical skills to produce detailed stock reports and resolve operational issues, while maintaining a professional and collaborative approach to support the wider team wherever needed.

OUTSOURCED FULLSTACK DEVELOPER DRAGON
TECH WALES
Jan 2020 – Jan 2021

During my tenure at Dragon Tech Wales, I maintained a record of punctuality and effective teamwork to deliver high-quality service. Translated complex client requirements into technical specifications while providing rapid troubleshooting and incident resolution to guarantee a positive client experience.
